

Premium Steam Dried Fishmeal: Quality Protein Source

We are pleased to offer premium steam dried fishmeal, a high-quality protein source for animal feed. Our product is derived from various pelagic fish species, including jack mackerel, anchovy, and sardine. This versatile fishmeal is ideal for aquaculture, poultry, and livestock industries, providing essential nutrients for optimal growth and health. With strict quality control measures in place, our fishmeal meets rigorous specifications to ensure consistency and reliability for our valued customers.

Product Specifications

1 Protein Content

Minimum 68% protein, ensuring a rich source of essential amino acids for animal growth and development.

2 Fat and Moisture

Maximum 10% fat and 10% moisture, maintaining optimal nutritional balance and product stability.

3 Mineral Content

Combined salt and sand maximum 4%, with sand alone not exceeding 1%. Maximum ash content of 16%.

4 Quality Indicators

TVN max 120 mg/100g, FFA max 10%, and histamine max 500 ppm, ensuring product freshness and safety.

Safety and Treatment

Antioxidant Treatment

Our fishmeal is treated with BHT antioxidant, with a minimum of 150 ppm at loading. This treatment helps preserve the quality and extend the shelf life of the product.

Microbial Safety

The product is guaranteed free from Salmonella and live insect pests, ensuring the highest standards of food safety for animal consumption.

Contaminant-Free

Our fishmeal is free from mammal bones and/or mammal bone slivers, maintaining the purity and quality of the fish-based protein source.

Packaging Options

Big Bags

New big bags of approximately 1,250 kilos each, suitable for bulk handling and storage.

Polypropylene Bags

New polypropylene bags of about 25 kilos each, ideal for smaller operations or retail distribution.

Shipping and Logistics

1

Shipment Period

Scheduled for August 2024, allowing for advance planning and inventory management.

2

Loading Port

Any Chilean port, including San Vicente, Lirquen, or Coronel, offering flexibility in shipping arrangements.

3

Destination

Guayaquil, Ecuador, with a CFR price of USD 2,080 per metric ton.

4

Container Stuffing

Packed in 40' containers, ensuring efficient transportation and handling.

Quality Assurance

Certified Surveyor

WSS or other first-class surveyor, at seller's option, ensuring impartial quality assessment.

Weight Verification

Final weight determined at time and place of loading, certified by the appointed surveyor.

Analysis

Comprehensive analysis performed at loading, with certificates issued by the surveyor.
