

Premium Steam Dried Salmon Meal

Introducing our premium steam dried salmon meal, a high-protein aquaculture feed ingredient. This product is carefully processed and treated with natural antioxidants to ensure quality and freshness. Sourced from 100% salmon and packed in convenient jumbo bags, our salmon meal is ideal for fish feed manufacturers looking for a nutritious and reliable protein source.

Product Specifications

1 Protein Content

Minimum 65% protein, ensuring high nutritional value for aquaculture feed.

2 Fat Content

Maximum 12-13% fat, providing essential fatty acids while maintaining product stability.

3 Moisture Level

Maximum 10% moisture, ensuring optimal product consistency and shelf life.

4 Ash Content

Maximum 17% ash, indicating a balanced mineral content.

Quality Assurance

1

Antioxidant Treatment

Treated with 2,000 PPM of natural antioxidants (tocopherols) at production to maintain freshness.

2

TVN and FFA Control

TVN maximum 130-150 mg/100gr and FFA maximum 12%, ensuring product quality.

3

Histamine Regulation

Maximum 500 PPM histamine, adhering to safety standards.

4

Contaminant-Free

Free from Salmonella, live insect pests, mammal bones, and bone slivers.

Shipment Schedule

1

Order Placement

Customer confirms order and opens Letter of Credit.

2

Production

Salmon meal is produced and quality-checked according to specifications.

3

Packaging

Product is packed into jumbo bags and prepared for container loading.

4

Shipment

Scheduled for August 2024, subject to buyer's confirmation.

Storage and Handling

Storage Conditions

Store in a cool, dry place away from direct sunlight. Ensure proper ventilation to maintain product quality.

Handling Precautions

Use appropriate personal protective equipment when handling. Avoid creating dust during transfer operations.

Storage Charges

If shipment is delayed due to buyer's request, storage charges of USD 30/MT monthly will apply.

Product Applications

Aquaculture Feed

Primary use in fish feed formulations for various aquaculture species.

Protein Supplement

Can be used as a high-quality protein supplement in other animal feeds.

Sustainable Option

Offers a sustainable alternative to other fish meal sources in feed production.
